

Press Release

EU Digital Identity Framework Regulation

DEKRA certifies the first Qualified Preservations Service provider in Italy

DEKRA, a global leader in testing, inspection and certification (TIC) services, and a recognized Conformity Assessment Body (CAB) under eIDAS Regulation, has officially certified Namirial, a company leading the digital transformation of businesses, professionals, PAs and individuals. This achievement marks a significant milestone as Namirial becomes the first Trust Service Provider (TSP) in Italy to be certified for offering qualified preservation services.

Namirial, already a long-standing QTSP for several trusted services, has partnered DEKRA to become certified as a Qualified Preservation Service (QPRES) Certified TSP. This choice, considering the new EU Digital Identity Framework Regulation (EU 2024/1183), in force since May 2024 and fully applicable by 2026, represents an opportunity for the ever-expanding transformation and internationalization of data and digital object management services that Namirial can offer.

The qualified preservation service enables organizations to ensure long-term validity, integrity and legal reliability of qualified signatures and seals, maintaining the data associated with them secure despite future technological advancements. As digitalization progresses, preserving these data over time will be crucial for businesses, public administrations and individuals alike.

This eIDAS audit process for obtaining the qualified preservation service certification began with DEKRA's expert mapping ETSI standards to bridge the gap between the theoretical framework and its practical application. As QPRES is a modular service, it enables Namirial to offer its clients document management solutions throughout their entire lifecycle. This underscores their leadership in electronic archiving in this ever-evolving digital landscape.

"QPRES represents a unique differentiator in Namirial's portfolio, ensuring the long-term preservation of the evidential value of electronic signatures. It complements our

main qualified electronic archiving service by offering an alternative to our customers, further strengthening our European growth path. The involvement of DEKRA as a CAB in the accreditation process reinforces the importance of independent, trusted evaluation in delivering, high-assurance services.” emphasized Ugo Di Iorio, Chief Product Officer at Namirial.

María José Prieto, eIDAS Audit Manager at DEKRA stated: “The qualified preservation service will become critical for businesses as digitalization continues to grow. DEKRA is proud to deliver the highest level of eIDAS services to trust service providers. This achievement with Namirial highlights our commitment to advancing digital trust and electronic identification services.”

Recently, DEKRA has expanded its services portfolio with a new accreditation from the Spanish Entidad Nacional de Acreditación (ENAC) for two new eIDAS certification services: the qualified validation services for qualified signatures and electronic seals.

This reinforces DEKRA's role as an accredited CAB for the EU Digital Identity Framework Regulation. With our expertise, we promote cross-border interoperability and support our customers to comply with the future regulatory framework, strengthening their position at the forefront of digital identification services in the EU.

About DEKRA

For 100 years, DEKRA has been a trusted name in safety. Founded in 1925 with the original goal of improving road safety through vehicle inspections, DEKRA has grown to become the world's largest independent, non-listed expert organization in the field of testing, inspection, and certification. Today, as a global partner, the company supports its customers with comprehensive services and solutions to drive safety and sustainability forward—fully aligned with DEKRA's anniversary motto, "Securing the Future." In 2024, DEKRA is expected to generate revenue of 4.3 billion euros. Around 48,000 employees are providing qualified and independent expert services in approximately 60 countries across five continents. DEKRA holds a Platinum rating from EcoVadis, placing it among the top 1% of the world's most sustainable companies.

About Namirial

Namirial supports customers in their digital transformation journey by providing software solutions for trusted digital transaction management. Namirial digital trust products encompass solutions for customer onboarding, agreement automation, e-signature workflow orchestration, digital identification, certified communications, long-term qualified archiving, and electronic invoicing. Founded in 2000 in Italy, Namirial is operating today in over 85 countries, employing approximately 1000 people. Together with its international network of over 1,000 strategic partners, Namirial serves thousands of customers worldwide, processing several million transactions every day. Namirial is accredited as a qualified trust service provider under EU Regulation 910/2014 eIDAS and is actively engaging in the evolution of the EU Digital Identity Framework and new trust services as defined in EU Regulation 2024/1183.
