DEKRA Positions Itself as a Global Leader in NIS2 Compliance

Digital Trust Against Looming Cyber Threats

DEKRA, a global leader in testing, inspection, and certification, is expanding its NIS2 services, helping organizations to build digital trust against cyber security threats. With the upcoming entry into force of the European Union's groundbreaking NIS2 Directive in all member states, companies worldwide are facing strict new cybersecurity requirements, say DEKRA experts. Noncompliance could result in heavy penalties for companies.

The NIS(Network and Information Security)2 Directive represents a major expansion of the original NIS Directive, significantly broadening its scope and severity. Unlike its predecessor, NIS2 casts a wider net, encompassing many more critical sectors such as public administration, wastewater management, manufacturing (e.g., medical devices, automotive), and postal services. The directive also introduces stricter security requirements for risk management, supply chain security, and incident reporting. Most notably, it raises the stakes for non-compliance dramatically, with potential penalties of up to €10 million or 2% of global annual turnover, alongside personal liability for management.

The expanded scope of NIS2 brings thousands of medium and large-sized entities in critical sectors under its purview. Furthermore, the reach of NIS2 extends beyond the borders of the EU. Non-EU companies that provide services to essential or important entities within the European Union, such as cloud computing providers, data storage services, or managed security providers, will also be impacted. These third-party vendors must ensure their cybersecurity practices meet the directive's standards.

While countries like Germany have a delayed implementation timeline (at the end of 2025), this provides a valuable window for preparation. DEKRA's NIS2 services are designed to provide a clear path to compliance, offering:

• Expert Audits & Cybersecurity Readiness Assessments: Identifying vulnerabilities and compliance gaps against the exacting standards of the

About DEKRA

For 100 years, DEKRA has been a trusted name in safety. Founded in 1925 with the original goal of improving road safety through vehicle inspections, DEKRA has grown to become the world's largest independent, non-listed expert organization in the field of testing, inspection, and certification. Today, as a global partner, the company supports its customers with comprehensive services and solutions to drive safety and sustainability forward—fully aligned with DEKRA's anniversary motto, "Securing the Future." In 2024, DEKRA generated revenue of 4.3 billion euros. Around 48,000 employees are providing qualified and independent expert services in approximately 60 countries across five continents. DEKRA holds a Platinum rating from EcoVadis, placing it among the top 1% of the world's most sustainable companies.
