

Cyber Resilience Act Pilot Program

KEY BENEFITS

- 01** **Expert Support:** Practical CRA insights and training from DEKRA security evaluators.
- 02** **Early Alignment:** Reusable deliverables to align with CRA before the application date of Dec. 2027.
- 03** **High Value:** Broad CRA coverage at a competitive price.

DEKRA's CRA pilot program will be valid until the end of 2026

WHAT DOES THE PILOT INCLUDE?

1 Hour Workshop + Attendance Certificates

A workshop intended to provide manufacturer's technical and sales staff with an overview to CRA, highlighting the relevant dates, requirements and conformity assessment procedures.

Categorization up to 3 Products

A categorization of up to 3 products according to Annexes III and IV of the regulation.

Checklist for Compliance

Checklists to support manufacturers develop their procedures in compliance with Annex I of the regulation to conduct risk assessments, follow a secure development lifecycle, and handle vulnerabilities.

Evaluation of One Product

An evaluation of the 13 requirements of CRA for a product of the manufacturer's choice, based on the EU harmonized standards or essential requirements mapped with reference standards.

Attestation of Conformity

DEKRA's Attestation of Conformity offers a practical way to learn how to engage with a CRA Conformity Assessment Body as part of the EU-TEC process.
