

EU Battery Regulation Timeline

2023

Regulation enters into force

2024

Conformity of battery

- Performance and durability requirements
- Safety requirements of stationary battery energy storage
- CE marking and Conformity assessment procedures
- Information on the State of Health of batteries for Electric Vehicle, Light Means of Transport and Industrial Battery

Substances

- Restrictions on substances

2025

Carbon footprint declaration for Electric vehicle battery

Postponement due to final delegated act publication still pending

DELAY

2026

Carbon footprint declaration for industrial battery without external energy storage - delegated act publication pending

DELAY

2027

Battery due diligence policies

- Verification of due diligence policies

Marking and labelling requirements

- **Battery passport** for Electric vehicle, Industrial and Light Means of Transport battery

Removability and replaceability of portable and Light Means of Transport battery

2028

Carbon footprint declaration for Light Means of Transport battery

Recycled content declaration

2030

Carbon footprint declaration for Industrial battery with external energy storage

2031

Recycled content minimum requirement
