

Infosheet Automotive Cyber Security Management System Audit

Independent auditing of cyber security management systems (CSMS) in the automotive sector measures the strength and effectiveness of IT software, digital processes and operational systems to ensure robust protection and performance. DEKRA cyber security experts help you defend against systems and data breaches in efforts to prepare you for recognized CSMS certification.

Auditing services for objective assessment

Systems managing autonomous driving, connected cars, electric vehicles and shared mobility technologies depend on smart IT solutions and systems to provide consumers maximum reliability and performance. We conduct comprehensive auditing services for the realistic assessment of your Automotive Cyber Security Management System (ACSMS) to ensure critical data and operational systems are protected while operating at full capacity.

Assessing your automotive cyber security management system

The automotive cyber security management system (ACSMS) audit is specifically designed to help you develop, implement and maintain effective strategies and processes to ensure the quality of your products and services as well as protect your business against data breaches and operational disruptions. Specialized auditors with extensive experience in the automotive sector measure the performance of your CSMS, exposing weak spots and gaps while providing sound recommendations and solid solutions for a stronger, more efficient cyber security management system.

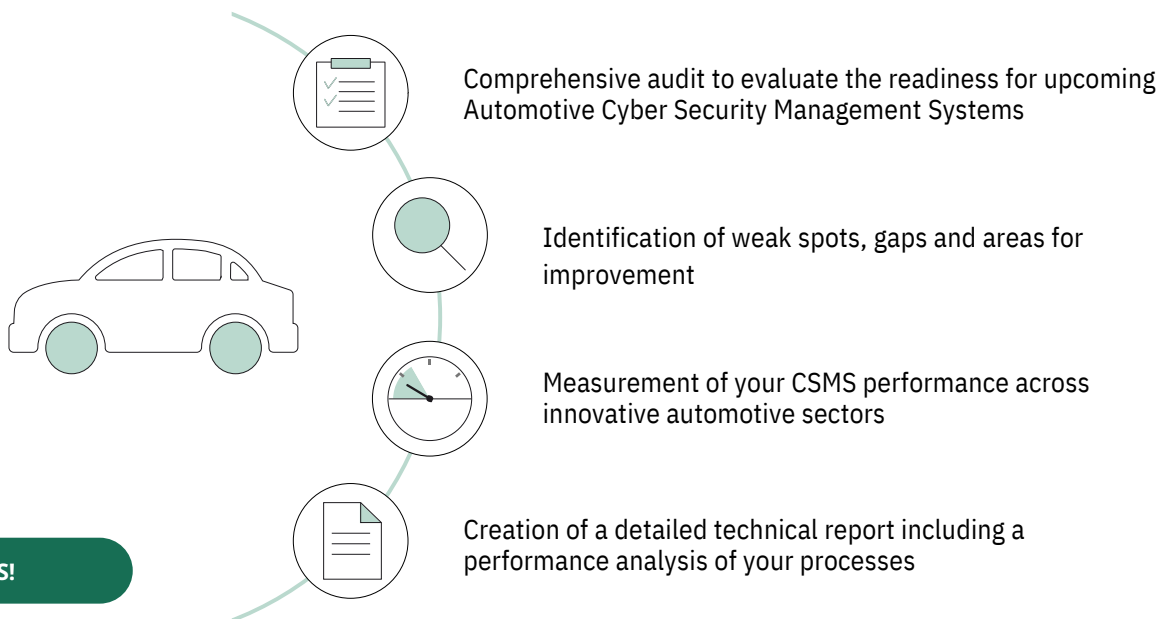

Expert auditing according to international standards

Cyber security management system (CSMS) audits for the automotive sector are conducted in accordance with the questionnaire and evaluation scheme of the VDA (Germany Association of the Automotive Industry), recognized UNECE R-155 requirements, ISO/SAE 21434 standards, and the ISO PAS 5112 auditing process to help minimize both operational and liability risks to keep you up and running in a secure business environment. The ACSMS audit proves your compliance with industry-relevant regulatory standards to facilitate smooth and faster entry into the target markets of your choice. Comprehensive assessment of your cyber security management system including examination of your supply partners demonstrates your corporate commitment to excellence underscoring quality assurance strategies aimed at heightening trust among your business partners and safeguarding your good reputation

Automotive services from a recognized and trusted partner

Our globally recognized services are designed to boost customer satisfaction and strengthen your brand image. We provide comprehensive assessment of your cyber security management system from a single source to ensure reliable, objective results. DEKRA auditing experts help you understand and comply with international standards established to maximize protections provided by a robust and effective automotive cyber security management system. We look forward to supporting you in your efforts at any time, anywhere in the world.
