

## Glossary of Commonly Used Terms and Definitions

| <u>Term</u>  | <u>Definition</u>   |
|--|---|
| <b>Certification</b>                                 | The process by which equipment is entered in the <i>Radio Equipment List</i> (REL) to signify that a product is certified and permitted to be manufactured, imported, distributed, leased, offered for sale, sold, installed or used in Canada..  |
| <b>Certification Body (CB)</b>                       | A foreign certification body that is designated under an international agreement, convention or treaty to which Canada is party and that is recognized by Canada under that agreement, convention or treaty as competent to certify equipment, to the effect that the equipment complies with the applicable standards; or a Canadian certification body that meets the requirements set out in requirements for certification bodies, as amended from time to time, published by ISED. |
| <b>Equipment Description</b>                         | A key field in which a brief description of the type of equipment is required.  |
| <b>Firmware Version Identification Number (FVIN)</b> | The FVIN identifies the firmware version used by the product, which controls/affects the RF characteristics of the product.   |
| <b>Hardware Version Identification Number (HVIN)</b> | The HVIN identifies hardware specifications of a product version. An HVIN is required for all products for certification applications.  |
| <b>Host Marketing Name (HMN)</b>                     | The HMN is the name or model number of a final product, which contains a certified radio module.  |
| <b>Product(s)</b>                                    | The product(s) refer to radio apparatus and broadcasting equipment.   |
| <b>Product Marketing Name (PMN)</b>                  | The PMN is the name or model number under which the product will be marketed/offered for sale in Canada.  |
| <b>Supplier</b>                                      | A generic term for an entity, such as the manufacturer, reseller, distributor, importer or other agent of equipment.  |
| <b><i>Radio Equipment List</i> (REL)</b>             | A list of certified radio and broadcasting equipment maintained by Innovation, Science and Economic Development Canada, signifying that the equipment has been certified; therefore, the supplier is permitted to manufacture, import, distribute, lease, offer for sale, sell, install or use this equipment in Canada.  |
| <b>Testing laboratory</b>                            | A laboratory that performs tests (see the latest version of ISO/IEC Standard 17025).  |
| <b>Unique Product Number (UPN)</b>                   | The UPN is assigned by the applicant, made up of a maximum of 11 alphanumeric characters (A-Z, 0-9).  |
