

DEKRA Safety Platform

Drive onsite safety, lower costs, and improve workplace efficiency

DEKRA is shaping the future of HSE, expanding its possibilities and enabling better and safer outcomes with a powerful combination of human expertise, transformative software and integrated safety systems.

A powerful tool set to enable a safer work environment

Combines DEKRA expertise, tools & insights into solutions that can be tailored to the needs of our customers.

Enables organizations to collect and analyze important data, optimizing every aspect of HSE performance.

Realtime analytics and monitoring help identify and mitigate risks to stop issues before they occur.

A level of transparency unattainable with conventional forms of documentation.

Data-driven insights to support decision-making and assess necessary actions.

Sustainable change through consistent reinforcement and accountability.

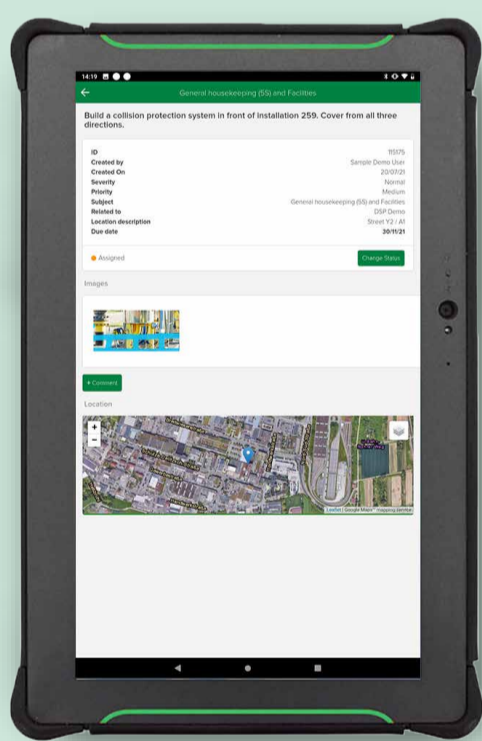

An ecosystem of digitally enabled safety solutions

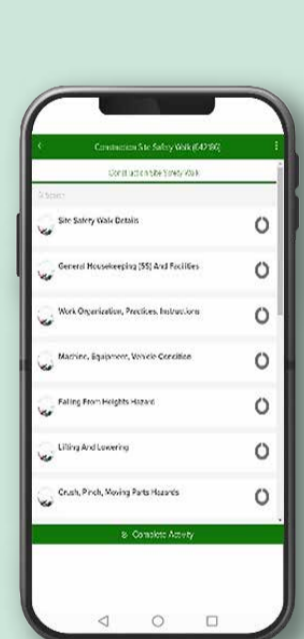

Easy to use application

Workers receive detailed guidance on daily activities and can communicate with others on any topic within their organization. The DEKRA Safety Platform utilizes app and browser functionalities and can be used with iOS and Android smartphones or via the web-browser. Utilization in explosive atmospheres is possible when using (existing) ATEX smartphones.

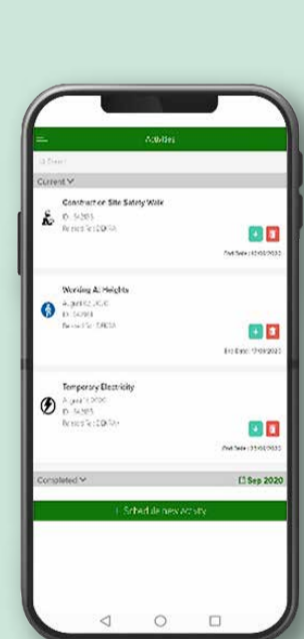

Report risks & hazards

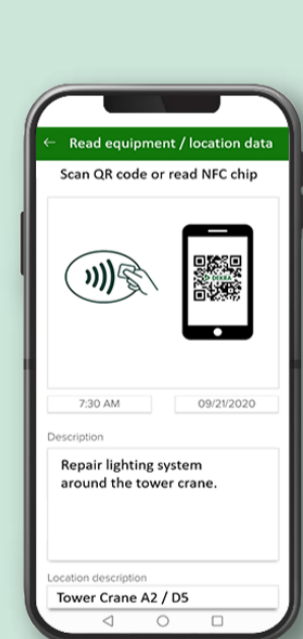

Record field activities

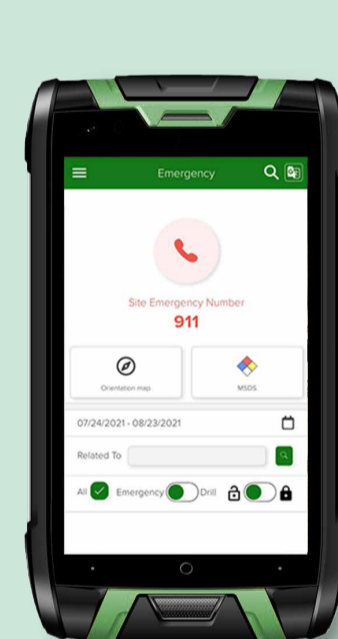

Make data collection & management easy

Utilize IoT & connected devices

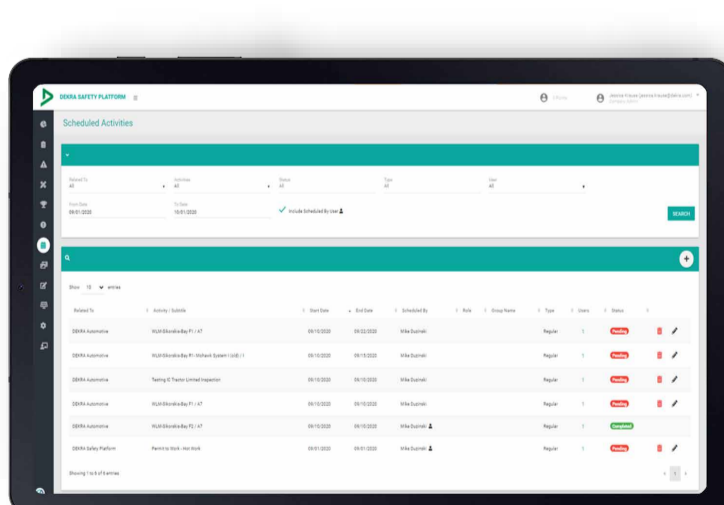

Manage permit to work and incidents

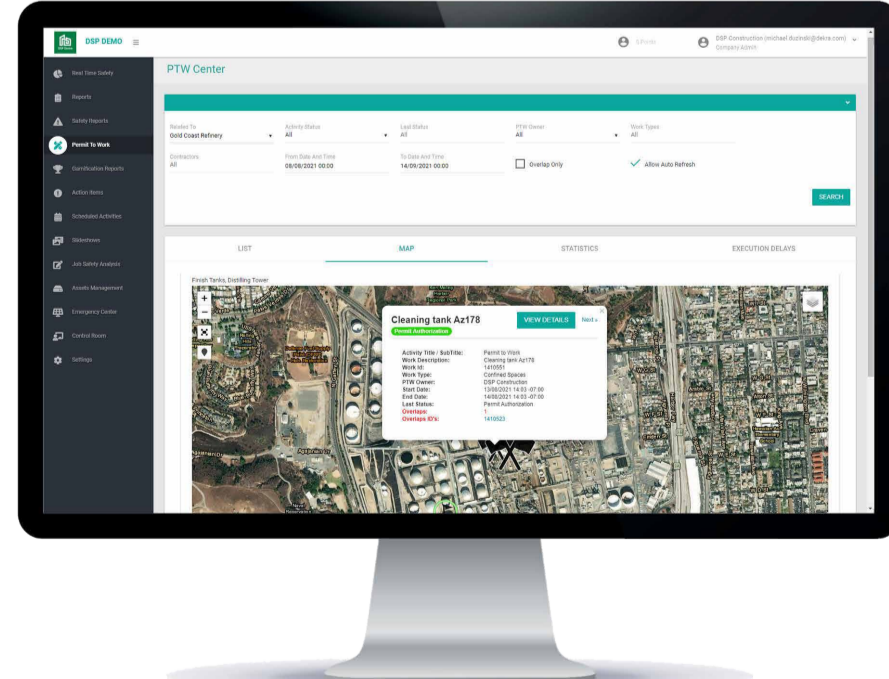

Interactive project & worksite overviews

Managers & safety experts can quickly respond to urgent situations. Real time data lets them make informed decisions and adjust safety strategy wisely.

Track & manage action items and activities

Manage permit to work and incidents

Access real-time overview, insights and trends

Integrated safety management platform

By connecting people, infrastructure and equipment in real time, day-to-day work becomes much faster and more efficient. Using smartphones and tablets, users can tackle multiple jobs in one go, and multi-tenant systems mean that everyone, regardless of location, stays on-track and up-to-date.

Safer projects.

Increased efficiency.

Peace of mind.
