

A close-up photograph of two hands cupping a small green seedling with three leaves and a ball of soil. The background is a bright, sunlit forest path. A dark green, curved graphic element is overlaid on the left side of the image, containing the text.

INTERNATIONAL SUSTAINABILITY AND CARBON CERTIFICATION (ISCC)

Embark on a transformative journey towards a sustainable future with DEKRA, powered by the International Sustainability and Carbon Certification (ISCC) – an avant-garde initiative and premier certification system. At the forefront of climate and environmental protection, decarbonization, and supply chain traceability, DEKRA proudly champions ISCC, standing tall as an independent multistakeholder force. DEKRA offers different ISCC certification schemes such as ISCC EU and ISCC PLUS to address various market requirements.

Why get certified under ISCC?

- ▶ Obtain a certification that serves as a testament to your products' adherence to sustainability criteria set by a globally acknowledged scheme, demonstrating conformity to your customers.
- ▶ Showcase your business's dedication to a circular economy approach, ensuring long-term sustainability and resilience in your operations.
- ▶ Leverage your sustainability verification across diverse industries, including chemicals, food, construction, cosmetics, and packaging, showcasing the versatility and relevance of your commitment.
- ▶ Present your commitment to the forefront of environmental practices by using the certificate to demonstrate the superior quality of your sustainability initiatives to both customers and partners.

ISCC EU

ISCC EU is recognized by the European Commission (EC) to demonstrate compliance with the legal requirements of the Renewable Energy Directive II (RED II). With ISCC EU certification the compliance with the legal requirements for the sustainability and greenhouse gas (GHG) emissions savings criteria for sustainable fuels and the production of electricity, heating and cooling from biomass set out in the renewed Renewable Energy Directive (REDII) for all Member States of the European Union can be verified.

ISCC EU Markets and Materials

Sustainable fuels used for transport, electricity, heating and cooling and the production of electricity, heating and cooling from biomass in the European Union. Covering biofuels, bioliquids, biomass fuels, advanced fuels, low ilUC risk fuels, RFNBOs and recycled carbon fuels (RCF).

With **DEKRA**, all types of agricultural and forest biomass, biogenic waste and residues, non-biological renewables and recycled carbon based materials can be certified under ISCC EU.

ISCC PLUS

ISCC PLUS is a voluntary certification scheme for non-regulated markets and covers food, feed, plastics and chemicals on a global scale, as well as biofuels for non-European markets. ISCC PLUS covers the same certification requirements as ISCC EU but can be customized to meet the needs of different markets or specific applications.

ISCC PLUS Markets and Materials

Circular and bio-based products, renewables, food, feed & biofuels outside the framework of the REDII.

With **DEKRA**, circular and bio-based products, renewables, food, feed & biofuels outside the framework of the REDII can be certified under ISCC PLUS.

ISCC EU Certification Approach for RFNBOs

ISCC developed an ISCC EU certification approach for Renewable Fuels of Non-Biological Origin (RFNBO) based on the Renewable Energy Directive (REDII) and the corresponding draft delegated acts published by the European Commission. DEKRA has already gained experience in accelerating the certification of RFNBO. We are ready to certify projects located in the EU as well as export projects selling to the EU.

Why choose DEKRA for ISCC?

As a globally recognized testing and certification organization, we bring an abundance of expertise not only to the ISCC certification process but also to a comprehensive array of certification schemes within the sustainability domain.

Operating globally, DEKRA ensures that, irrespective of your geographical location, our team of experts delivers certification services. Our network of qualified and international auditors has been providing optimal support for ISCC certification for many years.

DEKRA has established a longstanding relationship to serve as a sustainable service provider, enhancing the value of your products and services. Accredited by ISCC, we invite you to contact us today and embark on the first step towards a more sustainable tomorrow.
