Subject: EU CE Directive/Regulation overview and its Update

主題：歐盟 CE 指令/法規概述及更新

LVD, EMC, Machinery Directive (MD), RED, CRA, Toy, Noise Directive, Battery, RoHS, WEEE, REACH, Packing, Food Contact, EMF and ecodesign requirements for sustainable products

低電壓、電磁相容、 機械指令、無線電設備、網路安全，玩具、噪音指令、電池，RoHS、WEEE、REACH、包裝，食物接觸、電磁場和可持續產品節能指令/法規及其更新通知

Dear Valued Clients／尊敬的客戶：

In accordance with the recent publication of the Directives, we would like to draw your attention to the following Directives and its updates.

我們特通知您歐盟和電器產品相關指令及其更新通知，敬請留意：

RED Essential Requirement

Article 3.1 a **Health and Safety**	**Article 3.1 b** **EMC**	**Article 3.2** **RF**	**Article 3.3 d/e/f** **Cybersecurity**	Part I, 2 and 3 of (EU) 2022/2380 **Common charger**
health and safety of persons and domestic animals and property, but with no voltage limit applying	adequate level of electromagnetic compatibility	efficient use of radio spectrum in order to avoid harmful interference.	Network protection, protection of personal data and privacy	Common charger for mobile phones and other portable electronic equipment
			ETSI EN 303 645	2.1.be equipped with the USB Type-C receptacle, 2.2.be capable of being charged with cables 3.1.incorporate the USB Power Delivery 3.2.ensure that any additional charging protocol allows for the full functionality of the USB Power Delivery
			EN 18031-1:2024 Start of legal effect: 30.01.2025 1: The sections named 'rationale' and 'guidance', in this harmonised standard, do not confer a presumption of conformity with the essential requirement set out in Article 3(3), first subparagraph, point (d), of Directive 2014/53/EU.Notice 2: This harmonised standard does not confer a presumption of conformity with the essential requirement set out in Article 3(3), first subparagraph, point (d), of Directive 2014/53/EU if, when applying its clauses 6.2.5.1 and 6.2.5.2, the user is allowed not to set and use any password.	

			Notice 3: As regards the assessment criteria set out in clause 6.3.2.4 of this harmonised standard, this harmonised standard does not confer a presumption	
			EN 18031-2:2024 EN 18031-3:2024	
			EU 2022/30 EU 2023/2444 The essential requirement set out in Article 3(3), point (e), of Directive 2014/53/EU shall apply to any of the following radio equipment, if that radio equipment is capable of processing personal data, or traffic data or location data	

Article 3.3 d/e/f of 2014/53/EU

(d) radio equipment does not harm the network or its functioning nor misuse network resources, thereby causing an unacceptable degradation of service;

(e) radio equipment incorporates safeguards to ensure that the personal data and privacy of the user and of the subscriber are protected; (f) radio equipment supports certain features ensuring protection from fraud;

(f) radio equipment supports certain features ensuring protection from fraud;

EU 2022/30 supplementing Directive 2014/53/EU of the European Parliament and of the Council with regard to the application of the essential requirements referred to in Article 3(3), points (d), (e) and (f), of that Directive

EU) 2026/339

The repeal of Delegated Regulation (EU) 2022/30 does not affect the Union market surveillance and control, under Directive 2014/53/EU, of the compliance of radio equipment with the essential requirements set out in Article 3(3), first subparagraph, points (d), (e) and (f), of that Directive, if that radio equipment was or is placed on the Union market between 1 August 2025, from which date those requirements apply in accordance with Delegated Regulation (EU) 2022/30, and 10 December 2027, the day before Regulation (EU) 2024/2847 applies, and was subject to any of those essential requirements

	(EU) 2019/2021 Corrigendum:2020-02-24	electronic displays 電子顯示器	1 March 2021
	Article 6, first paragraph shall apply from 25 December 2019 Article 6 Circumvention and software updates The manufacturer or importer or authorised representative shall not place on the market products designed to be able to detect they are being tested (e.g. by recognising the test conditions or test cycle) and to react specifically by automatically altering their performance during the test with the aim of reaching a more favourable level, for any of the parameters declared by the manufacturer, importer or authorised representative, in the technical documentation or included in any of the documentation provided. The energy consumption of the product and any of the other declared parameters shall not deteriorate after a software or firmware update when measured with the same test standard originally used for the declaration of conformity except with explicit consent of the end-user prior to the update. No performance change shall occur as result of rejecting the update. A software update shall never have the effect of changing the product's performance in a way that makes it non-compliant with the ecodesign requirements applicable for the declaration of conformity.

A-category - Direct hazard
The safety of the products is directly affected.
The implementation is carried out directly starting from adoption of resolutions, existing certifications are to be cancelled immediately and without notice.

B-category - Indirect hazard
An indirect hazard is eliminated by the decision.
Existing certifications do not fulfil the contents of the decision in its entirety.
Implementation starting from adoption of resolution; also running test and certification procedures must consider this resolution. Existing certificates have to be cancelled within 3 months (with a period of notice of 3 months maximum).

C-category – Test harmonization/safety increase
The decision is to guarantee that all test houses in future will conduct their tests according to the same standard, or the safety of the products will be increased. Nevertheless, old products still fulfil the minimum requirements.
Implementation at the latest after 3 months starting from adoption of resolutions, in order to be able to complete current tests.
Considering the test principle (DOC/DOW), existing certificates can be running up to the end of the 5 years cycle.

From the DOW onwards, any product falling into the scope of the relevant safety Directive should comply with the new amendment / edition of standard for DEKRA certification.

在指令失效日期後，任何申請或已申請 DEKRA 認證的產品，只要是在相關指令範圍之內，都必須符合這個最新指令的要求。

We would like to remind you that your products, which have already been certified by DEKRA without the consideration of the above Directive but they would still be available from the market after the corresponding DOW, should be resent to the respective DEKRA laboratory, in order to make sure that your product meets the requirement of new Directive.

我們想告訴您的是，如果您的產品在 DEKRA 認證時沒有考慮以上更新的指令，而這些產品在舊指令失效日期後還將在市場上流通，那麼您必須把產品重新送到 DEKRA 的相關實驗室進行測試，以便確保您的產品符合最新的指令要求。

Annex I

Obligations of suppliers in relation to the product database

1. As from 1 January 2019, the supplier shall, before placing on the market a unit of a new model covered by a delegated act, enter in the public and compliance parts of the product database the information for that model, as set out in Annex I.
   2019 年 1 月 1 日後，新型號上市前，供應商應先把相關的資訊錄入產品資料庫

2. Where units of models covered by a delegated act are placed on the market between 1 August 2017 and 1 January 2019, the supplier shall, by 30 June 2019, enter in the product database the information set out in Annex I in relation to those models. Until data entry in the product database, the supplier shall make an electronic version of the technical documentation available for inspection within 10 days of a request received from market surveillance authorities or the Commission.
   2017 年 8 月 1 日到 2019 年 1 月 1 日之間上市型號，供應商最遲要在 2019 年 6 月 30 日前錄入資訊到產品資料庫

3. The supplier may enter in the product database the information for models, as set out in Annex I, the units of which were exclusively placed on the market before 1 August 2017.
   2017 年 8 月 1 日前上市的產品，供應商也可以選擇錄入資訊到產品資料庫

4. A product for which changes are made that are relevant for the label or the product information sheet shall be considered to be a new model. The supplier shall indicate in the database when it no longer places on the market units of a model.
   如果產品更改設計標貼和產品資訊的，也認為是新型號。如果產品不再投放市場的，供應商要在資料庫裡注明

5. The obligations referred to in paragraphs 1 and 2 of this Article shall not apply to packages of heaters referred to in Commission Delegated Regulations EU No 811/2013, EU No 812/2013 and EU 2015/1187 , where the provision of labels for those packages is the sole responsibility of the dealer.
   上述 1、2 條要求，對於 EU No 811/2013, EU No 812/2013 and EU 2015/1187 對應的各種類型加熱器不適用

6. After the final unit of a model has been placed on the market, the supplier shall keep the information concerning that model in the compliance part of the product database for a period of 15 years. Where appropriate in relation to the average life span of a product, a shorter retention period may be provided for pursuant to point (q) of Article 16(3). The information in the public part of the database shall not be deleted.
   某型號產品停止銷售後，供應商要至少保留資料庫資訊 15 年。如果考慮到產品的平均壽命，資訊保留期限可以少於 15 年，但在資料庫裡的資訊不能刪除。

Annex II

Annex II

rechargeable portable batteries

‘portable battery’ means a battery that is sealed, weighs 5 kg or less, is not designed specifically for industrial use and

is neither an electric vehicle battery, an LMT battery, nor an SLI battery;

'portable battery of general use' means a portable battery, whether or not rechargeable, that is specifically designed to be interoperable and that has one of the following common formats 4,5 Volts (3R12), button cell, D, C, AA, AAA, AAAA, A23, 9 Volts (PP3);

Battery type 電池類型	Period 時間線	Requirement 要求	Regulation 電池法規條款號

starting, lighting and ignition batteries (SLI batteries)

'starting, lighting and ignition battery' or 'SLI battery' means a battery that is specifically designed to supply electric power for starting, lighting, or ignition and that can also be used for auxiliary or backup purposes in vehicles, other means of transport or machinery;

All batteries	From 18 August 2024	1.accompanied by instructions and safety information in an official language 2.marked and labelled in accordance with Article 13 3. draw up an EU declaration of conformity 4.affix the CE marking 5. keep the technical documentation 6.bear a model identification and batch or serial number, or product number or another element allowing their identification 7. name, registered trade name or registered trade mark, their postal address, indicating a	Article 41 Obligations of importers

		single contact point, and, if available, web and email address	
rechargeable industrial batteries, LMT batteries and electric vehicle batteries	From 18 August 2024	Parameters related to electrochemical performance and durability 1. Rated capacity (in Ah) and capacity fade (in %). 2. Power (in W) and power fade (in %). 3. Internal resistance (in Ω) and internal resistance increase (in %). 4. energy round trip efficiency and its fade (in %). 5. The expected life-time of the battery	Article 10 and Annex IV part A Performance and durability requirements for rechargeable industrial batteries, LMT batteries and electric vehicle batteries
electric vehicle batteries;	18 February 2025	carbon footprint declaration	Article 7, 1 Carbon footprint of electric vehicle batteries, rechargeable industrial batteries and LMT batteries
all batteries	From 18 August 2025	separate collection of batteries 分類收集符號	Article 13 Labelling and marking of batteries
a) lead-acid batteries b)lithium-based batteries; (c) nickel-cadmium batteries; (d) other waste batteries.	By 31 December 2025	a)recycling of 75 % by average weight b)recycling of 65 % by average weight c) recycling of 80 % by average weight d) recycling of 50 % by average weight	Article 71 and Part B of annex XII Targets for recycling efficiency
All batteries 所有電池	From 18 August 2026	containing the general information on batteries set out in Part A of Annex VI. 1.the manufacturer 2.battery category and information identifying the battery 3.the place of manufacture 4.the date of manufacture 5.weight 6.capacity 7.chemistry 8.hazardous substances present in the battery, other than mercury, cadmium or lead 9.usable extinguishing agent 10.critical raw materials present in the battery in a concentration of more than 0,1 % weight by weight	Article 13 Labelling and marking of batteries
rechargeable portable batteries, LMT batteries and SLI batteries	From 18 August 2026	containing information on their capacity	Article 13 Labelling and marking of batteries
electric vehicle batteries	From 18 August 2026	carbon footprint performance class requirements	Article 7 2 Carbon footprint of electric vehicle

			batteries, rechargeable industrial batteries and LMT batteries
portable batteries and LMT batteries	From 18 February 2027	batteries are readily removable and replaceable by the end-user at any time during the lifetime of the product. That obligation shall only apply to entire batteries and not to individual cells or other parts included in such batteries	Article 11 Removability and replaceability of portable batteries and LMT batteries
all batteries	From 18 February 2027	QR code	Article 13 Labelling and marking of batteries
LMT batteries and electric vehicle batteries	From 18 February 2027,	battery passport shall comprise (a) information accessible to the general public in accordance with point 1 of Annex XIII; (b) information accessible only to notified bodies, market surveillance authorities and the Commission in accordance with points 2 and 3 of Annex XIII; and (c) information accessible only to any natural or legal person with a legitimate interest in accessing and processing that information for the purposes referred to in points (a) and (b) of the third subparagraph in accordance with points 2 and 4 of Annex XIII.	Article 77 Battery passport
rechargeable industrial batteries with a capacity greater than 2 kWh, except those with exclusively external storage	From either 18 August 2027	Meet minimum values for the electrochemical performance and durability parameters	Article 10 2 and annex IV Part A Performance and durability requirements for rechargeable industrial batteries, LMT batteries and electric vehicle batteries
All batteries	31 December 2027	(a) 90 % for cobalt; (b) 90 % for copper; (c) 90 % for lead; (d) 50 % for lithium; (e) 90 % for nickel.	Article 71 and Part B of annex XII Targets for recovery of materials
electric vehicle batteries	From 18 February 2028	maximum life cycle carbon footprint threshold	Article 7, 3 Carbon footprint of electric vehicle batteries, rechargeable industrial batteries and LMT batteries
LMT batteries	by 31 December 2028	collection targets of waste LMT batteries (a) 51 %	Article 60 Collection of waste LMT batteries.
LMT batteries	From 18	carbon footprint performance	Article 7, 2

	February 2030	class	Carbon footprint of electric vehicle batteries, rechargeable industrial batteries and LMT batteries
rechargeable industrial batteries except those with exclusively external storage	18 August 2030	carbon footprint declaration	Article 7 Carbon footprint of electric vehicle batteries, rechargeable industrial batteries and LMT batteries
(a) lead-acid batteries; (b) lithium-based batteries	By 31 December 2030	a)recycling of 80 % by average weight b) recycling of 70 % by average weight	Article 71 and part B of annex XII Targets for recycling efficiency
industrial batteries except those with exclusively external storage, electric vehicle batteries and SLI batteries	From 18 August 2031	1)documentation containing information about the percentage share of cobalt, lithium or nickel that is present in active materials 2)recovered from battery manufacturing waste or post-consumer waste 3)the percentage share of lead that is present in the battery and that has been recovered from waste Note: for each battery model per year and per manufacturing plant.	Article 8, 2 Recycled content in industrial batteries, electric vehicle batteries, LMT batteries and SLI batteries
LMT batteries	by 31 December 2031	collection targets of waste LMT batteries (a) 61 %	Article 60 Collection of waste LMT batteries .
All batteries	From 31 December 2031	recycling efficiency (a) 95 % for cobalt; (b) 95 % for copper; (c) 95 % for lead; (d) 80 % for lithium; (e) 95 % for nickel.	Article 71 and Part B of annex XII Targets for recovery of materials
rechargeable industrial batteries with external storage	18 February 2032	carbon footprint declaration	Article 7 Carbon footprint of electric vehicle batteries, rechargeable industrial batteries and LMT batteries
industrial batteries except those with exclusively external storage, electric vehicle batteries, LMT batteries and SLI batteries	From 18 August 2036	minimum percentage recovered from battery manufacturing waste and/or post-consumer waste (a) 26 % cobalt; (b) 85 % lead; (c) 12 % lithium; (d) 15 % nickel.	Article 8, 3 Recycled content in industrial batteries, electric vehicle batteries, LMT batteries and SLI batteries

Annex III

EU 2025/40 packaging and packaging waste

包裝和包裝廢棄物

Period	Requirement	Regulation

時間線	要求	法規條款號
From 12, August 2026	food-contact packaging shall not be placed on the market if it contains per- and polyfluorinated alkyl substances (PFAS) in a concentration equal to or above the following limit values to the extent that the placing on the market of packaging containing such a concentration of PFAS is not prohibited pursuant to another Union legal act: 食品接觸包裝 PFAS 限制生效	Article 5 Requirements for substances in packaging
From 12 August 2028	packaging placed on the market shall be marked with a harmonised label containing information on its material composition 統一包裝標籤要求生效（含材料成分）	Article 12 Labelling of packaging
From 1 January 2030	minimum percentage of recycled content recovered from post-consumer plastic waste 塑膠包裝最低再生含量 (a) 30 % for (PET) (b) 10 % other than PET (c) 30 % for single-use plastic beverage bottles; (d) 35 % for plastic packaging other than those referred to in points (a), (b) and (c) of this paragraph maximum empty space ratio, expressed as a percentage, is 50 %. 重量體積最小 50% not place on the market packaging in the formats and for the uses listed in Annex V. 按照附錄 V 的限制使用的包裝樣式	Article 7 Minimum recycled content in plastic packaging Article 24 Obligation related to excessive packaging Article 25 Restrictions on use of certain packaging formats ANNEX V Restrictions on use of packaging formats
From 1 January 2040	minimum percentage of recycled content recovered from post-consumer plastic waste 塑膠包裝最低再生含量提高 (a) 50 % PET (b) 25 % other than PET c) 65 % for single-use plastic beverage bottles; (d) 65 % for plastic packaging other than those referred to in points (a), (b) and (c) of this paragraph.	Article 7 Minimum recycled content in plastic packaging
