Validation Sustainability Report According to DNK

After remote assessment, inspection of documents and interviews with responsible employees, we confirm the credibility, transparency and plausibility of the information in the Sustainability Report 2021, published by

DEKRA SE

at the location

Handwerkerstraße 15, 70565 Stuttgart

DEKRA SE has drawn up its Sustainability report 2021 according to The Sustainability Code and using sets of indicators in accordance with the GRI indicators.

The focus of the examination of the sustainability report is the stakeholder management and the review of the indicators. This includes selection of stakeholders and communication with them, assessing their needs, the determination of the most important aspects of sustainable development as well as the validation of the indicators.

The validation of the sustainable performance presented in the report is conducted by a sampling method.
