GMP+
CERTIFICATION FOR ANIMAL FEED

Feed plays an important role in the safety of food of animal origin. The GMP+ certification system targets feed quality and is based on ISO 9001 supplemented to meet both the legal and specific operational requirements of the feed production chain.

What the GMP+ standard represents

The GMP+ module Feed Safety Assurance Scheme (FSA) is an international certification system to ensure the safety of animal feed. It covers all stages of the feed production chain, from the cultivation of raw materials, the production of compound and straight feed stuffs, additives and premixes to trade, storage and transport. The Feed Responsibility Assurance (FRA) module focuses on sustainable feed.

Goals of the GMP+ standard

With the introduction of the GMP+ standard, you
- Ensure the traceability of your goods and maintain a complete overview of the preliminary and by-products used;
- Send a signal that you are aware of your responsibility for food and feed safety;
- Provide your company with access to global markets and credibly demonstrate your commitment to food safety and sustainability.

What we offer Steps to successful certification

We are approved for GMP+ certification in the following areas: GMP+ B 1 and GMP B 1.2: Manufacture, trade and services

- **GMP+ B 2: Production of feed ingredients**
- **GMP+ B 3: Trade, collection, storage and transshipment**
- **GMP+ B 4: Road and rail transport and chartering**
- **GMP+ B 4.3: Code of hygiene for inland navigation**
- **GMP+ B 8: Manufacture of and trade in petfood products**
- **GMP+ BCN CEE: Additional requirements for Central and Eastern Europe**
- **GMP+ BCN QM: Milk**
- **GMP+ FRA**

Our auditors have many years of experience in the feed industry and take into account your individual operational circumstances.

Steps to successful certifcation

1. Briefing
- Clarification of open questions
- Joint definition of the next steps
- Project discussion or optional pre-audit

2. On-site audit including document verification
- Verification of your GMP+ system
- Verification of the implementation of your documented statements in day-to-day business

3. Audit report including:
- Results of our evaluation
- In case of discrepancies, indication of optimization potential and reassessment if necessary

4. Certificate & DEKRA seal
- Presentation of the certificate after successful completion of the certification process
- Issue of the DEKRA seal for the duration of your certificate

5. Annual monitoring

Meet the requirements of national and international trading partners

Save time and money

Ensure traceability of goods

Maintain a valuable international competitive advantage

Benefits of our GMP+ Certification

Gain a complete overview of the preliminary products and by-products used

Strengthen your position in the global marketplace

Optimize processes and increase efficiency

Secure the trust of customers and business partners

Other services to benefit you

We also certify your quality, environmental or safety management systems according to many other international standards, including ISO 14001, ISO 45001, ISO 22000 and IFS Food. We are happy to help you combine these standards efficiently. Our portfolio includes more than 40 accreditations worldwide.
In addition, the DEKRA Group offers comprehensive services to ensure quality:

- **Evaluations for compliance with internal rules, e.g. supplier requirements**
- **Training and education, e.g. for quality management officers**
- **Personal certifications, e.g. for quality managers**
- **Product testing and certification, e.g. EMV, CE, GS for electrical and electronic devices**

Awarded
The DEKRA Seal

Offer your customers security and quality - with our DEKRA seal!
The DEKRA seal stands for the highest level of reliability - across industries and internationally. It creates trust and gives your customers assurance that they are on the safe side. Our seal is your strength. Use it as an image enhancer and marketing instrument. We are happy to offer our support.

Are you interested in our comprehensive GMP+ certification?
Our experts will be happy to discuss it with you in a personal conversation. Contact us today!
