

Services Pressure Equipment

Free passage to EU and UK DEKRA as partner and notified body

Are you a manufacturer of pressure equipment and would like to successfully place your products on the European market? This can be done quickly and easily with competent support from a single source: As a notified testing and certification body, DEKRA supports you from the planning and design phase throughout to final assessment. As a notified body, we enable you to access the EU market with a CE mark- and through our UK-partner – the UK-market with a UKCA mark promptly and with legal certainty.

Our notification for your secure market access

Free movement of goods is guaranteed for pressure equipment that bears the CE mark within the EU and vice versa free movement is guaranteed for pressure equipment that bears the UKCA-mark in the UK market. With DEKRA as your partner, you can be sure that your products are not delayed along their journey to EU and UK. Our engineers use in-depth expertise in the field of pressure equipment and assemblies for your legal security. With us, your products will not only be introduced into the market faster but will also comply with all required regulations after our certification. As a notified body, we are approved for all conformity assessment procedures of pressure equipment.

Conformity assessments according to British legislation

Would you like to place your pressure equipment and assemblies on the U.K. market? DEKRA can carry out conformity assessment procedures in accordance with the U.K. legislation PES (R) 2016. Our experts conduct all tests on your premises and ensure smooth certification by our integrated U.K. partner.

What DEKRA offers

Our experts are at your side with their know-how and practical experience - competently, on schedule, and flexibly. Take advantage of these benefits:

- ▶ Legal certainty after thorough execution by experienced DEKRA experts
- ▶ Individual consideration of your operating procedures and conditions on-site
- ▶ Comprehensive, reliable, and flexible support from a permanent contact person
- ▶ Uniform services and assessment standards nationwide – exclusive to DEKRA
- ▶ We support you from the very beginning: practical, uncomplicated, and consistently – always with your goals in mind

With joined forces for your product success

From A to Z: With DEKRA you have a partner by your side who supports you in all phases of product development. Our range of services includes all conformity assessment procedures- both tests and certifications). We carry out system certifications and expert reports and tests as an Approved Inspection Body to several national regulations (Swedish AFS, MSBFS, SÄIFS, German ZÜS) finish national regulation for periodic inspections and in-process monitoring.
