

The background of the slide is a photograph of a person's hand resting on a white electronic device, possibly a car's infotainment system. The hand is wearing a silver watch and a silver ring. The background is blurred, showing green foliage and a bright light source. A large green semi-circle is overlaid on the left side of the image, containing the text.

Certification according to DIN 77200

DIN 77200 product sheet

The issue of public safety and security has become a central and important concern in the public discourse. Although feeling safe is always a subjective matter, at the objective level, much can be done to make people safer and enable them to walk around in public places freely. Now more than ever, heavily used public spaces and buildings are areas in which safety and security are the top priorities. This is an area in which operators can consciously control their security standards.

What DIN ISO 77200 stands for

To stand out as a high-quality provider of security services in the highly competitive marketplace and to participate in public tenders, potential clients often require objective proof of a service provider's performance and quality. With certification according to **DIN 77200** in conjunction with the internationally recognized **ISO 9001** standard, you create transparency, comparability and ensure the verifiability of your performance.

Areas of application of DIN 77200

The DIN 77200 certification process can be applied to the following security services:

- ▶ Stationary security services
(alarm service, reception service, surveillance service)
- ▶ Mobile security services
(facilities service, intervention service, surveillance service)
- ▶ Event service

Your benefits from certification according to DIN 77200

With a certification according to DIN 77200, you document your high standards of quality as a security company. In doing so, you demonstrate your competence and professionalism to both your private customers and public clients. This gives you a valuable competitive advantage and increases your chances of securing tenders. Certification also optimizes your organization and processes, helping to increase your effectiveness and minimize your liability risk.

Our experts will be happy to inform you about appropriate certifications for you. Contact us now!
