

The background of the slide is a photograph showing a pair of hands holding a large amount of grain, likely wheat or barley, over a brown paper bag. The grain is being poured from the hands into the bag, creating a dynamic scene with some grain falling. The lighting is warm, highlighting the texture of the grain and the skin of the hands.

**Safety and  
quality with GMP+  
certification**

GMP+ product sheet

Animal feed plays an important role when it comes to the safety of food of animal origin. The GMP+ certification system is tailored precisely to the feed chain. It is based on the requirements of ISO 9001 and has been supplemented with factors relating to the safety of animal feed, so that it meets both the legal requirements and the operational particularities of companies operating along the chain of production for animal feed.

### What the GMP+ standard stands for

The GMP+ “Feed Safety Assurance Scheme” (FSA) module is an international certification system to ensure the safety of animal feed. It covers all stages of the feed chain: from the cultivation of raw materials, through the production of compound and straight feedstuffs, additives and premixtures, to retail, storage and transport. The “Feed Responsibility Assurance” (FRA) module is of relevance to sustainable feed

### Objectives of the GMP+ standard

With the introduction of the GMP+ standard

- ▶ you ensure the traceability of your goods flows and therefore have a complete overview of the primary- and secondary products used,
- ▶ send a clear signal that you are aware of your responsibility as a feed-producing business for food and feed safety,
- ▶ you provide your business with access to the global marketplace and demonstrate your commitment to this area.

## What we offer you

We are accredited for GMP+ certification in the following areas:

- ▶ Production of compound feed
- ▶ Production of compound feed – GMO controlled
- ▶ Production of pet food
- ▶ Production of premixtures
- ▶ Production of premixtures – GMO controlled
- ▶ Production of straight feedstuffs
- ▶ Production of straight feedstuffs – GMO controlled
- ▶ Production of additives
- ▶ Production of additives – GMO controlled
- ▶ Retail with feed
- ▶ Retail with feed – GMO controlled
- ▶ Retail with feed – pet food
- ▶ Storage and transshipment of feed
- ▶ Storage and transshipment of feed – GMO controlled
- ▶ Road transport of feed
- ▶ Road transport – GMO controlled
- ▶ Rail transport of feed
- ▶ Inland waterway and coastal transport of feed
- ▶ Chartering of feed transport
- ▶ German QM Milch quality association

## Benefits of certification according to GMP+

Our auditors have many years of experience in the feed industry and will be happy to take your individual operational circumstances into consideration.

**Steps for your successful certification**

1. Information meeting
2. On-site audit including documents review
3. Audit report
4. Certificate and DEKRA seal
5. Annual surveillance

**Are you interested in obtaining GMP+ certification?**  
**Our experts will be happy to inform you on the procedure in a personal meeting. Contact us!**
