

**Document  
the high quality of your  
rehabilitation facilities**

QMS-REHA<sup>®</sup> product sheet

### Objective of QMS-REHA® certification

In accordance with the agreement on internal quality management according to Section 37 (3) of Book IX of the German Social Code (SGB), all inpatient rehabilitation facilities are required to demonstrate their rehabilitation-specific quality management. The aim is to provide credible proof of the high quality of services provided to persons receiving rehabilitation care.

As the operator of a medical rehabilitation facility or department, you are therefore required to introduce the industry-specific quality criteria and requirements of the QMS-REHA® guidelines and to implement them accordingly.

QMS-REHA® is based on DIN EN ISO 9001 and the EFQM model, and, above all else, focuses on process management. QMS-REHA® certification is possible either on its own or in combination with DIN EN ISO 9001.

### The benefits of certification

With **certification according to QMS-REHA®**, you meet the exacting requirements of the legislator and public authorities. You also benefit from a significant simplification of your processes and the more efficient and effective use of the resources associated with this.

Sustainably improve both the quality of the care you provide and your patients' safety with certification by us as an independent partner. Your certification also increases the satisfaction of your patients as well as business partners and staff.

## Your path to QMS-REHA® certification

### 1. Quote and order

Creation of an individual quote based on your information

### 2. Level 1 on-site audit

Review and audit planning

### 3. Level 2 on-site audit

Performance of the certification audit

### 4. Issuing of certificate

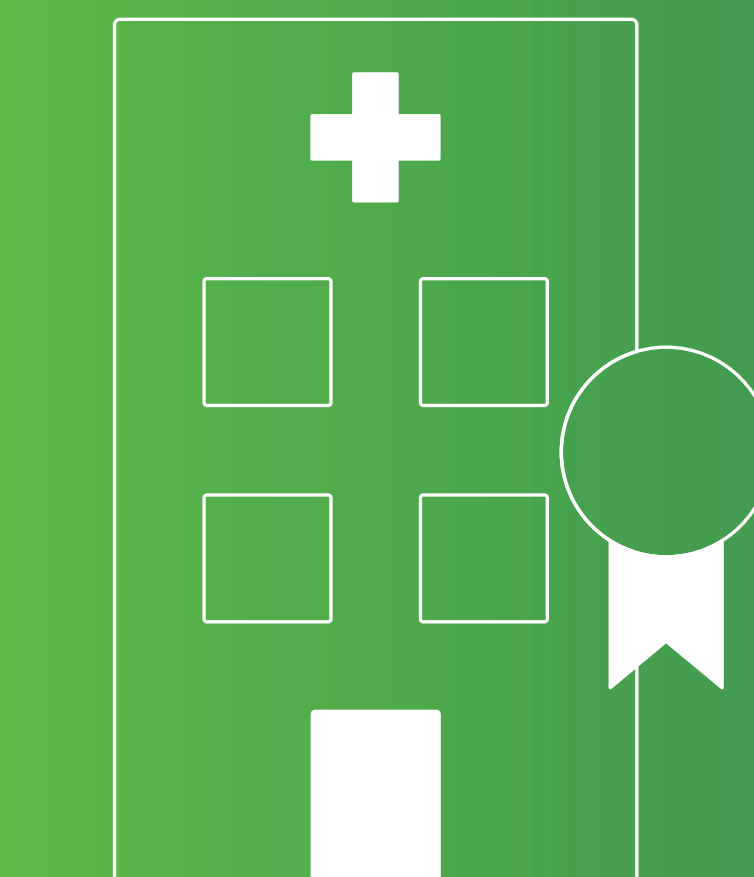

After the successful certification, you will receive our globally recognized seal
