

The background of the entire page is a close-up photograph of a person's hands holding a large quantity of light-colored wood chips. The hands are positioned in the center, with the wood chips piled high. The background is a blurred field of more wood chips, suggesting a large-scale biomass operation. The lighting is bright and natural, highlighting the texture of the wood chips and the skin of the hands.

**Certification
of your energy production
from sustainable biomass**

SURE **product sheet**

Demonstrate that your processes meet the requirements of the SURE certification system. We support you with demonstrating the sustainability of your biomass for energy production according to applicable regulations, with meeting high standards and with strengthening the confidence of your customers. Use our expert knowledge to your advantage on the market.

Purpose of the SURE standard

SURE (Sustainable Resources Verification Scheme) is a certification system intended to encourage sustainability and environmental compatibility in the production and use of biomass for energy generation. The SURE standard was developed by the SUSTAINABLE RESOURCES Verification Scheme GmbH and is aimed at companies that produce and sell biomass. It aims to guarantee and encourage environmental integrity, social responsibility and economic efficiency.

Through voluntary certification according to the SURE system, you can demonstrate your responsibility towards the environment and society. Let the outside world know that you meet the requirements of RED II regarding the sustainability of biomass for the generation of electricity or heating/cooling. In this way, SURE supports the transition to a more sustainable energy generation and contributes to the achievement of the global climate goals.

The SURE certification procedure

Advantages of your SURE certification

With the certification, you not only demonstrate your compliance with the legal requirements, you also sustainably improve your public image. Also, by providing access to all the relevant electricity and heating markets in the European Union, the certification provides you with a comprehensive competitive advantage. The SURE system also gives you the opportunity to make use of certain subsidies and supports the sustainable development and integration of new sources of raw materials. The certification therefore contributes to strengthening your market position and increasing your competitiveness.

What DEKRA offers

As the independent partner for your SURE certification, we can offer you holistic support. With our numerous locations and efficient digital communication channels, you save time and money. Benefit from the long-standing and cross-industry auditing experience of our experts as well as our recognized DEKRA seal, which strengthens the trust of your customers and business partners and opens up new competitive opportunities for you.
