

ORGANISATIONAL & PROCESS SAFETY

Service Guide

www.dekra-uk.co.uk

We are your data driven safety partner moving you beyond compliance to safe production, by creating a culture of care. We provide practical solutions to high hazard process industries in occupational safety, process safety and human reliability. Our people are motivated by a passion for life preservation, harm reduction, asset protection and performance optimisation.

Our vision? Be the global partner for a safer world. Our mission? To ensure safety by the interplay of technology and equipment, standards and practices and mindsets and behaviours.

Benefits - Process Safety

- > **Eliminate surprises:** expert testing in state-of-the-art laboratories provides clients with a thorough understanding of their unique risks
- > **Enhance efficiency:** an effective process safety management system supports quality, productivity & profitability and helps to protect our clients' reputation
- > **Facilitate compliance:** expert advice on regulatory and legal standards, both local and international, helps clients meet requirements

PROCESS SAFETY TESTING

Assessing the flammability, combustibility, as well as thermal and reactivity properties of materials in state-of-the-art laboratories by process safety experts and in accordance with local and international standards.

PROCESS SAFETY CONSULTING

Providing a comprehensive understanding of hazards and risks in the process industry, we consult & support our clients to implement and operate an effective process safety management system.

ORGANISATIONAL DIAGNOSTICS, ASSESSMENTS & DEVELOPMENT

Using trusted metrics to assess safety culture and care, we provide insights to help transform workplace culture, ensuring reliability and strengthening performance.

LEADERSHIP DIAGNOSTICS, ASSESSMENTS & DEVELOPMENT

Developing strong leadership with our diagnostic, coaching and training approach, designed to create a culture of care.

PROCESS SAFETY INSTRUMENTS

Designing and manufacturing of superior instruments complements our own consulting and training services but also supports our clients to equip their laboratories.

PROCESS SAFETY COMPETENCE DEVELOPMENT

Providing training & education in all areas of process safety, designed to ensure that competence is developed, measurable and sustainable.

WORKFORCE DIAGNOSTICS, ASSESSMENTS & DEVELOPMENT

Evaluating and engaging our customers' workforce at every level by deploying behavior-based strategies that drive transformational change and performance improvement.

SAFETY CONSULTING & ADVISORY SERVICES

Understanding the potential for improvement and ensuring safe and healthy work environments through DEKRA's expert advice, risk assessments, training, coaching & on-site support.
