

The background of the entire page is a blue-toned aerial view of an industrial facility, possibly a refinery or chemical plant, with complex piping and structures. Overlaid on this is a network of glowing blue lines and hexagonal nodes. Each node contains a white icon representing different aspects of supply chain risk management: a power plant, a gear, a radiation symbol, a solar panel, a wrench, a location pin, a bar chart, a smartphone, and a line graph. The overall aesthetic is high-tech and digital.

**Supply Chain Risk
Management
Services**

Because every chain is only as strong as its weakest link, effectively identifying and mitigating potential risk throughout every tier of the supply chain is key to the success of any organisation. DEKRA provides comprehensive Supply Chain Risk Management (SCRM) services to ensure every link in your supply chain is consistently **reliable, compliant and resilient.**

Building a Compliant Supply Chain

In today's business landscape, companies face increasing pressure to implement robust SCRM strategies that ensure resilience and compliance. As legislation continues to evolve, it's crucial to align your operations with secure supply chains that meet regulatory guidelines.

DEKRA is a team of seasoned specialists equipped with extensive SCRM experience and regulatory expertise. We understand the unique challenges faced by your industry and specific geographic locations. Let us guide you through the complex landscape of existing and upcoming regulations, like:

- ▶ German Supply Chain Due Diligence Act,
- ▶ EU Corporate Due Diligence Regulation coming in 2024,
- ▶ Digital Operational Resilience Act (DORA) effective in January 2025,
- ▶ US regulations and other related mandates.

With DEKRA by your side, you can confidently mitigate risks and intricacies in your supply chain. Our experts will help you establish resilient supply chains that meet the standards set by both local and global authorities. Stay compliant, enhance your competitive advantage, and ensure the long-term success of your business!

The 21st Century Supply Chain

Successful company leaders understand the critical role of implementing proven Supply Chain Risk Management (SCRM) strategies. By doing so, they not only ensure regulatory compliance but also gain the resilience to adapt swiftly to technological advancements and meet evolving market demands. We recognise these needs and offer cutting-edge SCRM services that empower businesses to thrive in an ever-changing environment.

At DEKRA, we are focused on supporting companies committed to sustainable growth. Our state-of-the-art SCRM services are designed to help businesses quickly identify risks across their Tier N supplier ecosystems. DEKRA experts evaluate and prioritise high-risk and high-impact suppliers, so you can direct your efforts where they matter most. We take a proactive approach to help you mitigate the most significant threats and bring your risk back to an acceptable level.

DEKRA's SCRM services enable you to harness the power of AI technology, giving you a competitive edge in the market.

DEKRA approach to effective SCRM

Much like an iceberg, visible top tier supply chain partners are supported by a vast hidden network underneath the surface. Using AI data and official information to digitally map the entire supply chain, DEKRA experts examine risk in the ESG (environmental, social, governance), cyber, operations, legal and compliance categories.

Process of our Supply Chain Risk Management services

Our services help you expose traces of sanctions rules busting, modern slavery, human and labour rights violations, environmental issues, health and safety hazards, fraud, data breach, GDPR non-compliance and many more risks that may affect your brand reputation or disrupt your supply chains. Mapping provides a complete view and proper analysis of deeper problems to determine a supplier risk score.

Once a supplier has been identified as a risk, DEKRA auditors perform comprehensive assessment to highlight specific issues so you can better evaluate the situation, mitigate the risk or replace supplier if necessary. Our DEKRA assessment platform can be used for easy access to scheduling oversight, auditor assignments, assessment data, and real-time reporting.

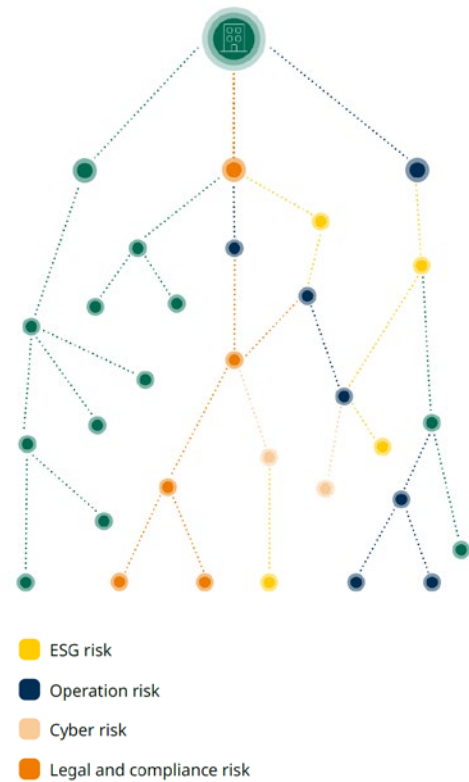

Our customisable end-to-end SCRM services are designed to minimise external risk for maximum resilience, sustainability, and compliance throughout your supply chain.

On the ground where you need us

A leading provider of Supply Chain Risk Management (SCRM) services, DEKRA is the go-to global partner for businesses looking to optimise their supply chain. We offer comprehensive solutions for managing supply chains, enhancing performance and ultimately driving growth. Our credentialed risk experts span every geographical region and industrial sector. DEKRA auditors working on the ground are well aware of established industry standards as well as local, regional and international regulations. We look forward to providing you state-of-the-art Supply Chain Risk Management services – wherever you do business.
