

# DEKRA at Innovation Zero

A partner to the world's largest sustainability and net zero event

*"On behalf of DEKRA, thank you to the organizers, Innovation Zero, and attendees, all of whom gathered at London Olympia for the UK's largest net-zero industry event. It was a privilege to be a partner, moderator, and help make a safer, more secure, and more sustainable world."*

## The Keys to Unlocking Decarbonised Transport

Promoting the need for a secure, incentivized, accessible and sustainability transportation sector with supportive infrastructure to promote active and low-carbon mobility.

**80%**

reduction in oil-based transportation is required to attain net zero transportation

**95%**

people-opt for more carbon-intensive modes of transport when a low-carbon alternative is readily accessible

**£700k**

value lost every minute we delay achieving a swifter transition to net zero

**£10bn**

could be saved within the UK's NHS if we encourage active travel and reduce associated health conditions

**100 years**

to reach fully accessible transport at the present investment rates, with insufficient considerations for electric vehicles
