Subject: **Update of Inmetro Regulation n.º 62:2022 – Luminaires for street lighting**

As a result of the publication on February 17, 2022, of Inmetro Regulation n.º 62:2022 of luminaires for public street lighting, DEKRA Certification BV communicates the main changes, deadlines and transitional provisions for your knowledge and relevant actions.

Deadlines and transitional provisions

- The publication of Inmetro Regulation n.º 62:2022 does not imply the need to start a new certification process based on the requirements consolidated herein;
- The certificates already issued will be revised, with reference to the Inmetro Regulation n.º 62:2022, during the next maintenance; and
- During the next maintenance, the requirements established by Inmetro Regulation n.º 62:2022 will be considered.

The Inmetro Regulation n.º 20:2017 is not valid more.

The Inmetro Regulation n.º 62:2022 replaced it and this new one is already in force and establishes all the necessary requirements for the certification process and also for the applicable tests.

Here you can find the link to the mentioned new one:

<https://www.in.gov.br/en/web/dou/-/portaria-n-62-de-17-de-fevereiro-de-2022-382395692>

The main changes established by the Inmetro Regulation n.º 62:2022 are:

- a) The Seal ENCE is obligatory to be marked on the package;
- b) For the grouping of **discharge lamp luminaire families**, the rated declared life must also be considered;
- c) The rules and regulations mentioned in the item “Complementary Documents” have been updated;
- d) The requirement 11 of Inmetro Regulation n.º 20:2017 Annex II – where the position of Conformity Identification Seal on the product should be informed, now it is not more required; and
- e) The Technical Specifications Worksheet (PET) model has been updated.
