

# Incident Reporting

## Identify and evaluate incidents to reduce workplace risk

This application provides safety managers with the necessary tools to effectively analyze root causes and develop effective corrective actions. Additionally, the ability to link incident investigations to behavior-based safety (BBS) programs increases the likelihood that your safety program will be successful.

# How we do it

## Incident Reporting

The Incident Reporting application is configurable, allowing a user to track specific incident details and the capability to assign and track corrective actions.

## Features

- Customize incident types, forms and investigations to what your programs currently track
- Pre- and post-risk assessment capabilities
- Track incident reports and investigations to completion
- Cost tracking
- Upload photos and supporting documents for detailed reference
- Analyze reports to identify incident trends and root causes
- Identify inadequate or ineffective policies, training or behavior
- Assign corrective actions specific to incidents
- Enter and generate OSHA 300, 300A and 301 forms (U.S. customers)
- Generate corrective action assignment notifications to key personnel's email or mobile device
- Supports multiple languages

## About Us

We are consultants and business partners to many of the world's largest chemical, oil and gas, transportation, utility, pharmaceutical, and agriculture companies. Through a transformational approach, we guide clients in evolving both their organizational culture and their operational environment, enabling them to reduce exposures and injuries, save lives, protect assets—and in the process, achieve higher performance.
