

MANAGE RISK FROM HAZARDOUS MATERIALS:

WAREHOUSE DISTRIBUTION CENTERS.

Do you know the explosion hazards associated with shipping and storing fertilizer?

AMMONIUM NITRATE

is stable at room temperatures but can decompose explosively under high heat, like a warehouse or vehicle fire. A fire starts near the inventory, usually allowing workers to escape but giving firefighters time to respond. After about 30 minutes Ammonium Nitrate detonates,

**OFTEN KILLING ALL
NEARBY FIREFIGHTERS.**

AMMONIUM NITRATE IS NOT ALONE.

What do you know about the hazardous chemicals you store and ship?

Understand and manage the hazards associated with reactive, hazardous materials.

STORE SAFELY

SHIP RESPONSIBLY
