Vehicle Electrification Essentials

Navigate a smooth transition to electric with these important safety and preparedness checks.

1

Specialized Training

- ❓ *Is your team trained for EVs?*
- ✅ Ensure proper safety and emergency handling training for electric vehicles.

Essential Tools and PPE

- ❓ *Are you equipped for EV maintenance?*
- ✅ Equip your staff with specialized tools and personal protective equipment necessary for EVs.

2

3

Safety Policies

- ❓ *Have you established a hierarchy of risk control methods?*
- ✅ From elimination to PPE, mitigate the six levels of hazards when working with electric vehicles.

Emergency Equipment

- ❓ *Is your life-saving gear ready?*
- ✅ Maintain readily accessible life-saving equipment, designed specifically for EV incidents.

4

5

Safety Procedures

- ❓ *Who handles lock out – tag out?*
- ✅ Designate a responsible employee for critical safety procedures during vehicle maintenance.

Prepare for a smooth Transition to Electric
