

Protecting personal data

ISO 27701

With a certification according to ISO 27701, you document that the security of information and the protection of personal data is particularly important to you as a company.

Aim of the ISO 27701 certification

Since the introduction of the GDPR, data protection has become an important topic for many companies and a prerequisite for the performance of their activities. The introduction of a corresponding data protection information management system is therefore essential. ISO 27701 offers a useful supplement to ISO 27001 and provides additional criteria for data protection.

What DEKRA offers you

Our experts certify the extended protection of your

information security based on an existing ISO 27001 certification according to ISO 27701. We review your privacy information management system according to the applicable requirements for effective safeguarding of personal data.

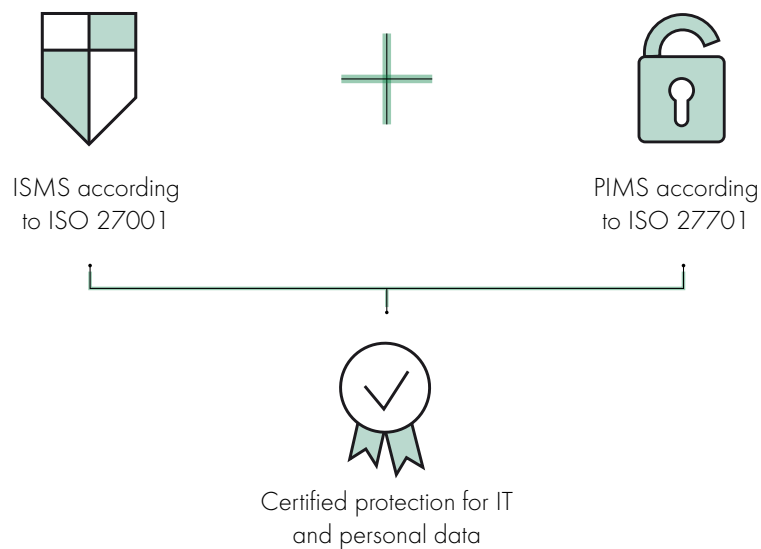

With a privacy management certification, you fulfill normative requirements and demonstrate to the outside world your efforts for improved information security. With us at your side, you will also increase the satisfaction and trust of your customers and business partners.

Steps to successful certification

The process of ISO 27701 certification by our experienced experts is structured as follows:

- 1. Information consultation**
Meeting to determine the scope
- 2. Readiness assessment**
Readiness analysis with evaluation and review of the management system description
- 3. Certification audit**
On-site audit to evaluate the implementation and effectiveness of the information security management system (ISMS) and the data protection management system (Privacy Information Management Systems, PIMS)
- 4. Certificate**
After successful completion you will receive your certificate and the DEKRA test seal
- 5. First and second surveillance audit**
Yearly auditing of the practical implementation of the management system
- 6. Recertification**
Recertification before the period of validity of three years expires

The path to improved security in your company
