

DEKRA Adaptive Suite

Take control with an integrated EHS Management System backed by experts.

More data and regulations are making ensuring Environment, Health, and Safety more challenging than ever.

Managing EHS with spreadsheets or stand-alone applications consumes time and energy without yielding the best results. DEKRA Adaptive Suite changes that. It's one expert-created solution to help you leverage data, control exposures, make informed decisions, meet regulatory requirements, and keep people, property, and communities safe.

Identify

Why it works:

- Integrated applications handle Document Management, Audit Management, Training, Maintenance Management, Behavior Observations, and Incident Reporting
- Each app is purpose-built and configurable to your needs
- Web-based, so you never have to install or maintain software
- Scalable and flexible—meeting you where you are and supporting you as your company and industry grow and change
- Backed by a team of specialists to answer questions and troubleshoot

Discover the DEKRA Difference

While compliance is essential, EHS is more than ticking the box. It's about making your workplace safer and keeping employees healthy and injury-free. DEKRA Adaptive Suite supports holistic safety, helping you build and sustain a safety culture that engages employees. It empowers safety professionals to identify exposures to reduce injuries proactively. And it enables you to make better, data-informed decisions by meaningfully collecting, analyzing, and presenting safety information.

Your Trusted Advisor

DEKRA has decades of experience partnering with organizations across the globe to help them achieve and sustain outstanding safety performance. We dig deep to understand your organizational strengths, challenges, and desired outcomes, then work alongside you to enable your success.
