Hold a Private Training and Save!

Available at Your Location or Virtually

Do you need to train five or more people? Get the best value by holding a private course with our experienced instructors for as low as \$403 per person for 3-Day Internal Auditor training and \$620 for 4-Day Lead Auditor training.

We can present any course we offer, and we can even customize the content to your industry.

Get a Quote Today!

Delivery Methods

Virtual **V**

This is live, online training that combines our experienced instructors with the latest virtual learning methodologies to deliver an engaging, collaborative training experience from anywhere with an internet connection.

Public **P**

This is live training held in cities across North America throughout the year and is open to the public. Our instructors share their knowledge and experience with you face-to-face, and you will take any required exams during the scheduled course.

On-Site **S**

On-site courses are a practical and economical solution to training five or more people from your company. Our instructors can come to your location and present the course material exclusively to your employees, as well as proctor any exams.

Save More with Special Discounts!

Early Registration Discount

Register at least 30 days before the public course begins and enjoy these discounts off each seat:

Lead Auditor Courses \$150 off
Internal Auditor Courses \$100 off
All Other Courses \$50 off

Multiple Registration Discount

Purchase multiple seats and save even more. Enjoy these discounts on top of the early registration discount:

Lead Auditor Courses (6+ attendees) . . . \$300 off
Lead Auditor Courses (2-5 attendees) . . . \$100 off
Internal Auditor Courses \$100 off
All Other Courses \$50 off

About Us

DEKRA Management Systems Training, provides training in support of organizational improvement and implementation of international management system standards. We successfully participated in the RAB pilot project for ISO 9001 Lead Auditor Training in 1993 and the ISO 14001 Lead Auditor Training in 1996. **No organization has been doing RABQSA/ Exemplar Global Certified Lead Auditor Training longer.**

Established in 1989, we have grown to offer a full range of innovative training services to industry, government, non-profit, and service in areas of Quality, Environment, Energy, Food Safety, Occupational Health and Safety, and Information Security. Our full time staff and regional technical experts are fully qualified to provide the support you need.

Our Qualifications

Our skill set includes trainers with technical expertise in:

- Manufacturing
- Risk Management
- Automotive
- Service
- Occupational Health and Safety
- Air Pollution
- Medical Device
- Resource Management
- Pollution Prevention
- Emergency Preparedness
- Food
- Government
- Aerospace
- Health Care
- Military
- HACCP
- Agribusiness
- Energy
- Business Continuity
- Energy Management

Training

DEKRA is an Exemplar Global/Probitas Authentication-certified course provider offering a full array of ISO 9001, ISO 13485, AS9100, AS9110, ISO 14001, FSSC 22000, ISO 27001 and ISO 45001 courses including:

- ISO 9001 Foundations
- ISO 9001 Internal Auditor
- ISO 9001 Lead Auditor
- ISO 13485 Foundations
- ISO 13485 Internal Auditor
- ISO 13485 Lead Auditor
- ISO 14001 Foundations
- ISO 14001 Internal Auditor
- ISO 14001 Lead Auditor
- ISO 45001 Foundations
- ISO 45001 Internal Auditor
- ISO 45001 Lead Auditor
- FSSC 22000 Foundations
- FSSC 22000 Internal Auditor
- FSSC 22000 Lead Auditor
- ISO 27001 Foundations
- ISO 27001 Internal Auditor
- ISO 27001 Lead Auditor
- AS9100 Lead Auditor
- AS9100 Internal Auditor
- AS9110 Lead Auditor
- AS9110 Internal Auditor
- Competency Unit QM
- Competency Unit EM
- Competency Unit OH
- Competency Unit MD
- Competency Unit FS
- Competency Unit AU
- Competency Unit TL
- Competency Unit IS

Our ISO 9001 based courses are available with specific content for: AS9100, AS9110, ISO 13485, ISO/IATF 16949, ISO 17025, Food, Government, Service, Health Care, Military, and Agribusiness. Our ISO 14001 and ISO 45001 based courses can be customized with examples specific to your unique needs.

DEKRA also offers a series of courses designed to support implementation including:

- Executive Overview
- ISO 9001, ISO 13485, IATF 16949, AS9100, AS9110, AS9120, ISO 22301, FSSC 22000, ISO 14001, ISO 50001, ISO 27001, & ISO 45001 Internal Auditor – 2 and 3 day courses available
- Documentation – 1 and 2 day courses available
- Implementation – 1, 2, and 3 day courses available
- Integrated Auditing – QMS/EMS/EnMS/OHSMS
- Risk Identification & Management

All of our courses are available for presentation at your organization.
Check out our website or call us for a public course schedule.

Quality Management

ISO 9001:2015 Certified Lead Auditor

4 Days (In-Person or Virtual) • 3.2 CTU's

Understand the requirements of ISO 9001:2015 to be able to conduct a successful audit. The course includes hands-on workshops to prepare you for real-life auditing situations. You'll learn to manage and lead the audit process and complete reporting.

AS13100 Supplemental Training

3 Days (Virtual) • 2.4 CTU's

This course is for those in the aero-engine design and production supply chain who want to be able to interpret the requirements of the AS13100 standard, understand the application of the thirteen AESQ Reference Manuals and the recommended quality tools in them.

\$1445 Virtual

Virtual

December 16-18

Description

This 3-day course focuses on the AS13100 requirements that are supplemental to those in the AS9100 standard. Therefore, experience with AS9100 is required. There are hands-on activities, discussions and exercises to practice using the Reference Manuals and the quality tools, forms, and checklists provided in them.

**All attendees are required to bring their own copy of the AS13100 standard.*

Learning Objectives

- Understand the requirements and intent of AS13100.
- Determine the applicability of the AS13100 requirements according to supplier type.
- Identify the 13 AESQ Reference manuals that support the AS13100 standard.
- Analyze the use and applicability of the Reference Manuals.
- Understand the application of the quality tools in the Reference Manuals (8D, FMEA, MSA, Process Capability, APQP, PPAP, etc.).
- Understand and manage Human Factors in aviation safety

Quality Management

AS9110 Rev. C Certified Lead Auditor

5 Days (In-Person or Virtual) • 4.0 CTU's

Learn how to conduct and lead audits in the aerospace industry and assess compliance with AS9110. Conduct practical audit exercises tailored to the aerospace industry in order to apply these requirements and manage the audit process.

Virtual / In-Person

This course is available for presentation at your facility or virtually for your staff.

AS9110 Rev. C Certified Internal Auditor

3 Days (In-Person or Virtual) • 2.4 CTU's

Learn how to conduct internal audits in the aerospace industry and assess compliance with AS9110. Conduct practical audit exercises tailored to the aerospace industry in order to apply these requirements and manage the audit process.

Virtual / In-Person

This course is available for presentation at your facility or virtually for your staff.

Quality Management

ISO 13485:2016 Certified Lead Auditor

4 Days (In-Person or Virtual) • 3.2 CTU's

Understand the requirements of ISO 13485:2016 to be able to conduct a successful audit. The course includes hands-on workshops to prepare you for real-life auditing situations. You'll learn to manage and lead the audit process and complete reporting. This course has been specifically designed to meet the needs of the Medical Device Industry.

Virtual

January 27-30

Description

With this four-day, instructor-led course, you will be able to interpret the requirements of ISO 42001:2023 standard, manage the requirements of your AI systems, and role-play the audit process with complete reporting. The course includes hands-on activities and workshops to prepare you for real-life auditing. There is an exam for each competency unit (AI, AU and TL).

**All attendees are required to bring their own copy of the ISO 42001:2023 standard.*

Learning Objectives

- Define key AI terminology.
- Identify the core principles of AI Management Systems (AIMS).
- Interpret the requirements and intent of ISO 42001:2023 and how they apply to organizational contexts.
- Explain the importance and principles of responsible AI system development, deployment, and use.
- Demonstrate the implementation of AIMS planning, policy, objectives, and processes.
- Evaluate the effectiveness of an organization's AI risk assessment methodologies.
- Establish and align audit objectives for the AI audit program.
- Apply auditing principles, procedures, and methods as per ISO 19011:2018.
- Prepare a comprehensive audit report addressing all findings, non-conformities, and recommendations.
- Conduct follow-up activities to ensure the implementation and effectiveness of corrective actions post-audit.

- Identify the core principles of AI Management Systems (AIMS).
- Interpret the requirements and intent of ISO 42001:2023 and how they apply to organizational contexts.
- Explain the importance and principles of responsible AI system development, deployment, and use.
- Demonstrate the implementation of AIMS planning, policy, objectives, and processes.
- Evaluate the effectiveness of an organization's AI risk assessment methodologies.
- Understand the different types of audits and audit terms.

Testing and Calibration Laboratories

ISO 17025:2017 Certified Lead Auditor

4 Days (In-Person or Virtual) • 3.2 CTU's

This course is for those who want an in depth understanding of ISO 17025. Those who want to understand the audit process (ISO 19011), as well as how to prepare audit reports and presenting audit findings. You'll learn how to manage and lead an audit and manage an audit team.

RTP ISO 17025 Foundations Training
TPECS Competency units AU & TL

Auditing Skills

Documentation in ISO Standards

2 Days (In-Person or Virtual) • 1.6 CTU's

This course places documentation in its proper place as one of many tools used by organizations to assure results. People attending this course will understand and apply their newly acquired skills to determine when a traditional document is needed, alternatives to traditional documentation that may achieve better results, and how to configure documentation to meet the unique needs of the situation to be managed and the users.

This course is available for presentation at your facility or virtually for your staff.

Root Cause and Corrective Action

2 Days (In-Person or Virtual) • 1.6 CTU's

The purpose of this training is to explore the paths and tools available once a decision has been made to take action: either a correction to fix the problem or a corrective action to fix the cause(s) or root cause(s) of the problem.

This course is available for presentation at your facility or virtually for your staff.

EV Safety

High-Voltage Safety Training for Electric Vehicles

Safety Training for the Future of Mobility

Is your team prepared for the future of mobility? By 2030, electric vehicles are projected to account for 32% of the U.S. automotive market, growing to 45% by 2035. That growth means each member of your team needs to understand how to safely handle high-voltage systems and components. As a leader in safety, DEKRA offers comprehensive, flexible training for high-voltage automotive safety, with options to fit varied audiences, organizations, and learning styles.

Who should take High-Voltage Safety Training for Electric Vehicles?

Beyond technicians, this training is important for a wide range of roles. This includes managers, supervisors, office staff, and support personnel in service and collision repair facilities. Insurance customer-support representatives should also understand how to handle customer inquiries related to hybrid and electric vehicle (EV) accidents and malfunctions.

What industries need High-Voltage Safety Training for Electric Vehicles?

Automotive manufacturers, battery recyclers, EV battery technicians, EV device manufacturers and suppliers, and insurers can all benefit from high-voltage safety training. DEKRA training covers practical topics, such as:

- Identifying and locating high-voltage components
- How to work safely near high-voltage components
- How to determine whether a vehicle is de-energized
- De-energizing procedures
- Appropriate safety equipment and personal protective equipment
- First aid and emergency procedures

What options are available for High-Voltage Safety Training for Electric Vehicles?

High Voltage Safety e-Learning

- Online, on demand
- 60 competency modules
- Flexible subscription-based model
- Interactive format
- Available in English, Spanish, Italian, and German
- Access to a database of manufacturer information for all EVs

Digital learning options

Safety Fundamentals for Electric Vehicles

- 2-day, face-to-face, instructor-led course
- High-voltage safety training for EVs
- Features principles of electricity and safety illustrated with passenger vehicles

Contact us for details on a private training session

Private and Custom Classes

- Customized to meet your vehicles, specifications, or requirements
- Ability to combine in-person, virtual, and e-learning
- Designed and led by an automotive expert with extensive experience in high-voltage systems
- Based on the latest EV technology standards

Process Safety Training

Combustible Dust Fundamentals (NFPA 652)

2 Days (4, Half Day Sessions, Virtual)

NFPA 652 is the “On Ramp” to combustible dust requirements contained in the various NFPA Codes. It contains mandatory requirements for the management of the fire, flash fire, and explosion hazards posed by combustible dusts. Although this standard provides some flexibility in approaches for ensuring the safety of the occupants, facility, processes and equipment, some of the requirements must be complied with retroactively. Successful completion of the class with the quiz results in receiving a Dust Hazard Analysis (DHA) Leader certificate.

Flammable Liquids, Vapors and Gases

1 Day (2, Half Day Sessions, Virtual)

This course provides the knowledge and skills to identify, mitigate and protect against the hazards associated with flammable liquids, vapors and gases. The first day will encompass a detailed overview of the fundamentals of flammability, test methods and interpretation, electrostatic hazards and area classification, and relevant compliance standards, codes, and regulations. The second day will cover mitigation and protection strategies for handling, storing, and processing of flammable materials.

Process Safety Training

Hazardous Area Classification & Electrostatics Fundamentals

Offered as a bundle with Combustible Dust Fundamentals or Flammable Liquids, Vapors & Gas

This course will provide a systematic approach to identify, evaluate and control electrical ignition and electrostatic hazards. Attend this course to learn how to conduct an Electrical Classification study, learn how to evaluate ignition sources caused by mechanical equipment and electrostatic sources, and specify appropriate (electrical) equipment in the hazardous areas. The course covers aspects of NFPA 497 (Classification of Flammable Liquids, Gases, or Vapors and of Hazardous (Classified) Locations for Electrical Installations in Chemical Process Areas) and NFPA 499 (Classification of Combustible Dusts and of Hazardous (Classified) Locations for Electrical Installations in Chemical Process Areas).

Virtual	May 12-14	Flammable Liquids Vapors and Gases + Hazardous Area Fundamentals

Process Safety Management (PSM) Fundamentals

2 Days (4, Half Day Sessions, Virtual)

This course will identify and help you to understand the fundamental Process Safety Management (PSM), a subset of a Safety Management System (SMS) which relates principally to Major Hazards (Fire, Explosion, Runaway Reaction, Toxic Release) with adverse consequences on human, environment & business loss. The goal of a sound PSM program is to ensure that process facilities handling highly hazardous materials operate safely. This course provides an introduction into Process Safety Management which includes the history with case studies and regulatory guidance. It will provide a review of the two main PSM models: 14 elements outlined by US OSHA PSM and the 20-element approach of the Center for Chemical Process Safety (CCPS). Practical recommendations for how to implement process safety program elements will be discussed throughout the course.

Chemical Reaction Hazards

1 Day (2, 1/2 Day Sessions, Virtual)

Chemical reactions are used daily throughout the world to produce a variety of products. Under the right conditions, however, a reaction that has been conducted safely thousands of times can cause a catastrophic event due to unforeseen events or potential consequences. This course will teach you how to evaluate the risks of your chemical reactions to determine the worst-case consequences, design a safe scale-up process, and develop appropriate safeguards for each step in the scale-up process.

Process Safety Training

Emergency Relief Vent Sizing and Runaway Reactions

5 Days Virtual

This course is designed to cover the major aspects of safety relief systems sizing for single and multi-phase flow arising from loss of control of an exothermic chemical process. The course concentrates on the quantification and sizing of emergency vent systems for runaway reactions using experimental data derived from laboratory investigations. Emphasis is on the identification of the failure scenario and application of the appropriate calculation techniques required to arrive at correct system dimensions.
