

Unmask Hidden Health Hazards

5 Expert Tips to Help Protect Your Workforce in 2025

Your workplace could be hiding serious health hazards—chemical exposure, noise, and environmental stressors that put your team at risk. These threats can harm employees, disrupt operations, and increase liability.

DEKRA's expert industrial hygienists are here to help with 5 actionable tips to uncover risks, enhance safety, and build a healthier, more productive workplace. Don't leave your team's health to chance—take control today.

#1 Assess Workplace Hazards

- ✓ Identify chemical, physical, and biological stressors (dust, noise, toxins).
- ✓ Conduct real-time sampling for air quality, noise levels, and contaminants.
- ✓ Benchmark results against OSHA, ACGIH, and NIOSH standards.

#2 Control Exposure Risks

- ✓ Upgrade engineering controls: ventilation, filtration, and containment.
- ✓ Reinforce administrative controls: work rotations, training, and policies.
- ✓ Verify PPE: ensure proper fit, use, and compliance.

#3 Monitor Employee Health

- ✓ Schedule regular occupational health screenings (respiratory, hearing, skin).
- ✓ Track exposures with ongoing health surveillance programs.
- ✓ Use advanced monitoring tools for real-time hazard detection.

#4 Train and Educate Your Workforce

- ✓ Provide IH-specific training for employees and supervisors.
- ✓ Teach teams to recognize stressors and address exposures proactively.
- ✓ Empower safety culture to drive long-term compliance.

#5 Optimize your IH Program

- ✓ Audit your current IH program for gaps and inefficiencies.
- ✓ Set measurable goals to reduce risks and improve workplace health.
- ✓ Partner with experts to implement sustainable, compliant solutions.

For over 100 years, DEKRA has been a global leader in workplace safety and industrial hygiene. Our expert hygienists use advanced tools and customized solutions to tackle your unique challenges, identify hazards, drive compliance, and protect your workforce and operations.
